SKILLS

Extra  
Curricular

Shropshire and Herefordshire Junior County Golf Team

- Represented my county at golf at the age groups of under 12s until u18s.

PROFESSIONAL EXPERIENCE

Paused  
Perception

Junior Web Developer (2024 – Present)

- Delivered custom-coded Shopify and WordPress components for client projects.
- Took full responsibility for design and implementation of live WordPress websites, from requirements capture to delivery.
- Collaborated with clients to produce tailored solutions, building confidence in UI/UX design and client-facing communication.

PJ  
Financial  
Solutions

Admin & Data Analysis (2022)

- Supported financial consultants with data processing, reporting, and Excel-based analysis.
- Produced a document scraping python program to extract information from client documents to update databases.

Customer  
Service  
Roles

Various (hospitality & retail) (2019 – 2022)

- Worked in bar, sales, and customer service roles (pubs, golf club).
- Developed resilience, teamwork, and communication skills in fast-paced environments.

PROJECTS

Live Client  
Facing  
Business  
Management  
App

React Native + Firebase

- Built and deployed a full-stack mobile application for a small business
- Features: client/order management, task scheduling algorithm, estimated completion dates, automatic PDF invoice generation
- App is actively used daily to improve organisation and business efficiency

Android  
Allergen  
App

Kotlin + Firebase

- Built and tested a full stack android application.
- Features: barcode search feature that cross references a users “Allergen Profile” and an api returned ingredients list to test for any matches. If a match occurs then the user is advised that the product is not safe to consume. Users can save and search previously searched food items for future reference.

Automated  
Investment  
Model

MetaQuotes Proprietary Language (C++)

- Built and tested a working automated investing robot using the MetaTrader 5 software development platform.
- Features: Using statistical analysis of the correlation between the price movements of currency pairs, the model determined the relative strength of each currency independently and then allocated the majority of the portfolio to the strongest performing currencies.
